

EXTREMIFIX™

Cannulated Screw System

Rethinking Possibilities, Reshaping Lives

The ExtremiFix cannulated screw system offers 2.0, 2.4, 3.0 and 4.0mm cannulated screws in both headed and headless screw options to treat a variety of indications in the upper extremity. The ExtremiFix system is carefully engineered to encompass the following features and benefits:

- Titanium screws designed to provide superior bone purchase and excellent compression
- Self drilling and self tapping screws to facilitate the surgical technique
- Reverse cutting flutes to ease screw removal
- Low profile screw heads reduce soft tissue irritation
- Headless screws to facilitate countersinking, and feature a small trailing thread diameter
- Variety of sizes, from 2.0 mm for hand fractures and fusions to 4.0 mm for elbow injuries
- 1 system with 2 types of screws, allows for intra-operative decisions
- Tapered driver stems to facilitate percutaneous implantation
- 1mm screw implant size options

Implant Block Options

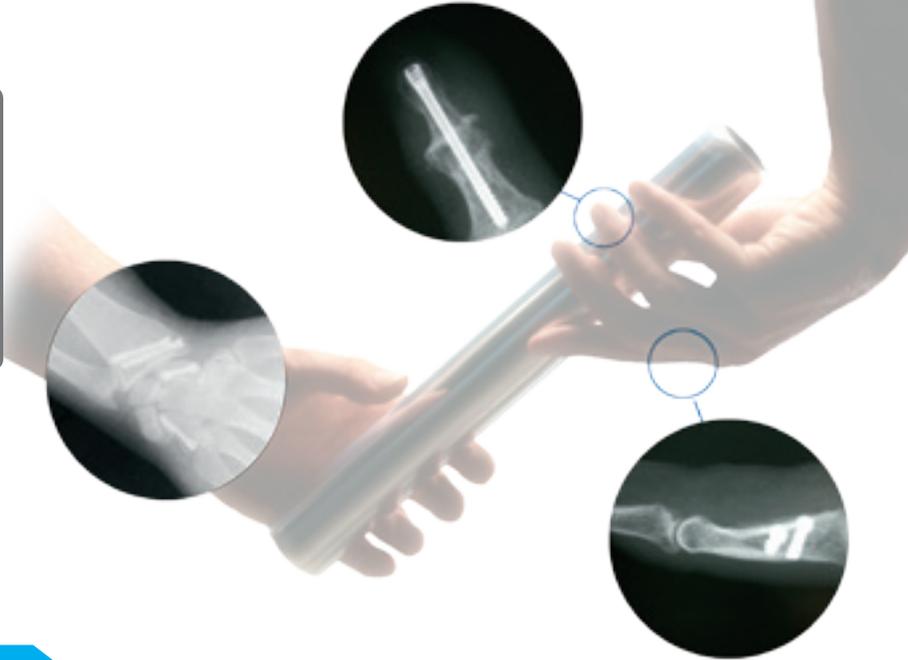

2.0/2.4mm BLOCK

3.0/4.0mm BLOCK

2.0-3.0mm Cannulated BLOCK

Implant Size Options

CANNULATED HEADED IMPLANTS

- | | |
|----------|------------------------------------|
| 319-20xx | 2.0mm x 6mm-14mm (1mm increments) |
| | 2.0mm x 16mm-42mm (2mm increments) |
| 319-24xx | 2.4mm x 6mm-14mm (1mm increments) |
| | 2.4mm x 16mm-50mm (2mm increments) |
| 319-30xx | 3.0mm x 10mm-40mm (2mm increments) |
| 319-40xx | 4.0mm x 12mm-52mm (2mm increments) |

CANNULATED HEADLESS IMPLANTS

- | | |
|----------|------------------------------------|
| 317-20xx | 2.0mm x 10mm-14mm (1mm increments) |
| | 2.0mm x 16mm-42mm (2mm increments) |
| 317-24xx | 2.4mm x 10mm-14mm (1mm increments) |
| | 2.4mm x 16mm-50mm (2mm increments) |
| 317-30xx | 3.0mm x 10mm-14mm (1mm increments) |
| | 3.0mm x 16mm-40mm (2mm increments) |
| 317-40xx | 4.0mm x 12mm-52mm (2mm increments) |
